Detailed Action

1. This Action responds to the "Response to Restriction Requirement" which was received October 2, 2003, wherein the Applicant elected Group I (claims 18-26). The Applicant canceled claims 1-17 and amended the independent claim 18 in his "Preliminary Amendment" filed October 10, 2001.

Allowable Subject Matter

2. Claims 18-26 are allowed.
3. The following is an examiner's statement of reasons for allowance:

With respect to the independent claim 18, prior art fails to disclose or make obvious, in addition to the accompanying features of the claim, an apparatus for surface treating a semiconductor wafer comprising: a surface treatment chamber; and a source of radiation illuminating a semiconductor wafer disposed inside the chamber under ambient pressure and atmosphere with a radiation having a wavelength in a near infrared range sufficient to create a plurality of electron-hole pairs near a surface of the wafer and to desorb any contaminant adsorbed on the surface of the wafer.

The dependent claims 19-26 are allowable by virtue of their dependence upon the independent claim 1.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. D.P. Jackson (2004/0003828 A1) discloses a precision surface treatment method of semiconductor substrates involving cleaning with the use of an RF frequency generated plasma at pressures near atmospheric.
